

Novel approaches to prevent and treat infectious diseases

Monday, September 29th, 2025 (online)

3:30 – 3:35 Florian Klein (University Hospital Cologne)

Welcome

3:35 – 4:05 Matthias Zehner (University Hospital Cologne)

Synergistic antibody cocktails targeting HCMV: a therapeutic approach to prevent viral escape

4:05 – 4:35 Hedda Wardemann (DKFZ, Heidelberg)

From antibody discovery to vaccine design against malaria

4:35 – 5:05 Sarel Fleishman (Weizmann Institute, Israel)

Computational design of therapeutic proteins

5:05 – 5:35 Rolf Fendel (University Hospital Tübingen)

Antibody responses after malaria parasite infection and immunization

Final conclusions
