

Information on requesting data and samples from the DZIF Transplantation Cohort e.V.

Dear applicant,

the DZIF Transplantation Cohort e.V. has a constantly growing number of detailed medical data of transplanted patients, as well as a selection of prepared biosamples. If you are interested in a trial version of the database to view the potentially collected data, please contact the coordinator of the DZIF Transplantation Cohort e.V., Dr. Daniela Schindler:

daniela.schindler@tum.de

In addition, we can give you an insight into the study protocol.

The following biosamples are collected:

RNA - blood (PaxGene)

- serum
- plasma
- PBMCs, purified
- urine
- stool
- buccal swabs

Data and samples are collected at the time of transplantation, after further 3, 6, 9, 12 months and annually thereafter, and in case of infection. If you are interested in data and/or samples, please use one of our application forms. You will first be asked to submit a preliminary application. This will be reviewed by our Scientific Steering Committee (SSC). Reviews take place 4 times a year.

If formal amendments are necessary, they must be submitted within 5 working days. If the pre-proposal is approved, you will be asked to submit a full proposal in which additional information is requested. This full proposal is evaluated by 2 international experts; on the basis of the expert opinions, the SSC makes its final decision. You have the possibility to appoint or exclude experts; please note this in your application. Alternatively, the DZIF Transplantation Cohort e.V. will select experts. The reviewers are not allowed to work for DZIF projects. Please send all applications and inquiries to the following e-mail address:

application.tx-kohorte@dzif.de

Your full proposal will be evaluated at the next possible meeting of the SSC as soon as the expert opinions are available.
